

Feedback for GWM Tutor Training - Level 3

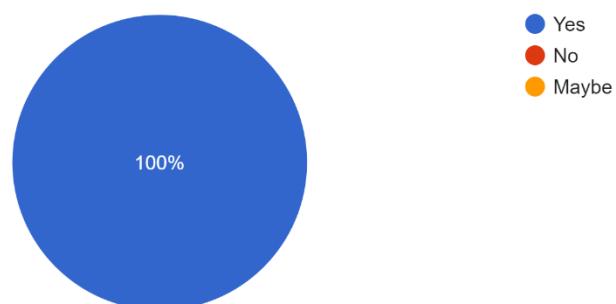

Do you feel confident to apply the techniques taught to your child:

3 responses

Did the program change your perspective on teaching multiplication and division

3 responses

What is your overall rating about the entire program?

5 responses

What is the one main thing you learnt from this Level 3 program?

- There are always different ways to approach a problem - there is no one correct method.
- How to EASILY explain multiplication, division and divisibility rules to kids
- Making math child oriented and connecting math to real life situations
- Good hand holding program for a parent like me.
- Based on my capacity to learn, I would prefer 1 hour duration with some additional sessions.
- After attending every level there is increase in confidence in approaching the subject and enabling the kid to like and learn the subject
- Nice program
